USDA Asks Farmers to Show Their Stewardship *Nationwide Survey to Focus on Irrigation*

WASHINGTON, Dec. 18, 2008 – Water is the source of life and the U.S. agricultural industry depends upon this precious resource to meet the world's growing need for food, feed, fiber and fuel. U.S. agricultural producers will soon have the opportunity to speak out about their water use when the U.S. Department of Agriculture (USDA) conducts the Farm and Ranch Irrigation Survey.

“By providing a single source of comprehensive, up-to-date information on irrigation and water use across the agricultural industry, this survey will aid in efforts to promote efficient irrigation practices and ensure the long-term sustainability of our nation's water resources,” said Carol House, deputy administrator of USDA's National Agricultural Statistics Service (NASS).

The irrigation survey, which is a supplement to the 2007 Census of Agriculture, will for the first time include a focus on nursery and horticultural operations. NASS will collect information about irrigation water use during 2008, including application methods, equipment, facilities, expenditures, crop acreage and yield.

This information is used by industry, government, and producers themselves, aiding in the development of improved technology, better equipment, more efficient water use practices, and sound programs and policies.

“The nation's agricultural producers are the first and best stewards of our land and water resources,” House said. “This survey provides them with a voice to help shape the future of their industry and demonstrate their commitment to the conservation and efficient use of water resources.”

On Jan. 12, 2009, NASS will mail the irrigation survey to 35,000 producers nationwide. Recipients are required to complete and return their forms by Feb. 17, 2009. As is the case with all NASS surveys, information provided by respondents is protected by law. NASS safeguards the confidentiality of all responses, ensuring that no individual producer or operation can be identified.

“As we did with the Census of Agriculture, we are reminding producers that the Farm and Ranch Irrigation Survey is their voice, their future and their responsibility,” House said.

For more information about the Farm and Ranch Irrigation Survey, call (800) 727-9540 or visit www.agcensus.usda.gov.
